Plot title: "Are Alone players improving?"

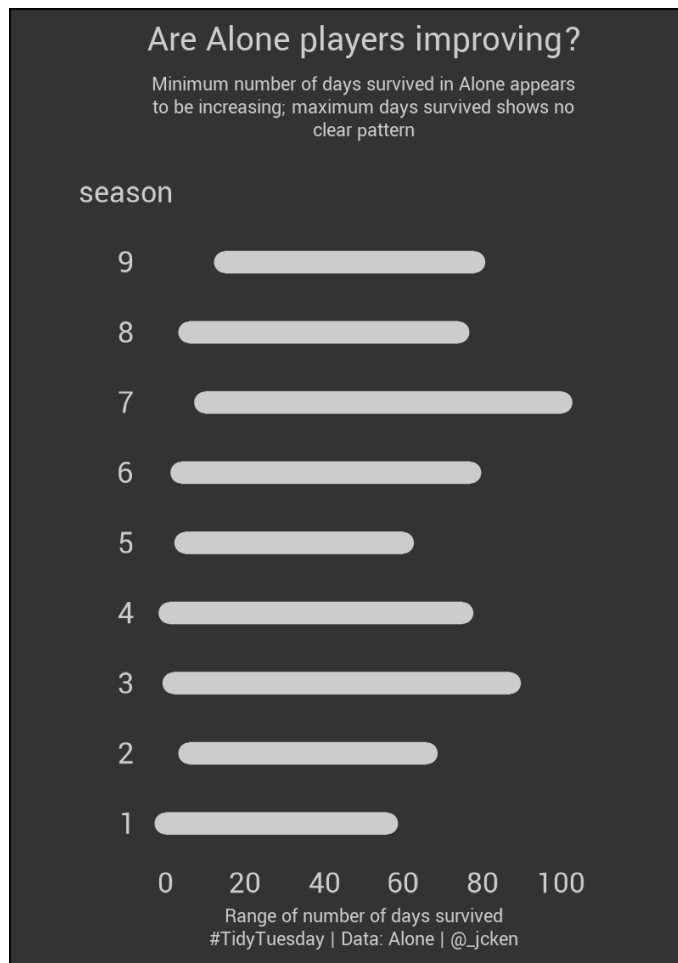

Subtitle: Minimum number of days survived appears to be increasing slightly; maximum days survived shows no clear pattern.

Tag: #TidyTuesday | Data: Alone | @_jcken

Dumbbell plot showing the minimum and maximum number of days survived by players in each season of "Alone". Top bar is Season 9, bottom is Season 1. Range of x axis is 0-100. Note that the height of the bars in the dumbbell are equal to the "weights" thus the dumbbell looks like a bar with rounded edges. The widest bar is for season 7 (10-100 days), shortest is season 5 (5-60 days). Plot is themed in a minimalist grey theme. Plot background is a dark grey whereas all text and dumbbells are a light grey.

Multiple line plot showing 3 lighthouse web accessibility metrics between late 2017 and late 2022. Title reads "Internet Accessibility on Mobile Devices" with the subtitle "Lighthouse metrics: sites are improving slowly but can still do much better". The top line shows that the median accessibility score was increasing in the period 2018-2021, but has since levelled off. The middle line shows a slight gradual increase in the proportion of images with alt-text, which is now above 50%. The final line indicates that over the entire period only around 25% of websites use colour schemes with acceptable levels of contrast.
